Water, Politics and Money

A Reality Check on Privatization
Water, Politics and Money
Manuel Schiffler

Water, Politics and Money
A Reality Check on Privatization
To Susanne, with Love.
Statement on the Use of Proceeds

The international nongovernmental organization WaterAid works to transform the lives of the poorest communities in developing countries by improving access to safe water, hygiene, and sanitation. WaterAid was founded in the United Kingdom in 1981 and now works in 26 countries.

All net proceeds of this book will be donated to WaterAid.
Acknowledgments

This book has been over 3 years in the making. Without the encouragement and support of many people, this book could not have been written. I would like to particularly thank Dr. Richard Franceys, who kept encouraging me to write the “book that is within me,” for his patient review of the entire manuscript and for improving the chapter on the United Kingdom. My gratitude also goes to Marine Colon, who volunteered her detailed knowledge of the water sector in France, Uganda, and Phnom Penh. Sophie Hermann was a critical reviewer of several other chapters, deftly spotting weaknesses of argument. Stefan Ehlert pushed me to go the last mile and to rewrite the conclusion and introduction one last time so that they hopefully meet the high standards I have tried to apply to the entire book.

My thanks also go to Professor Mark Oelmann and Edgar Firmenich who reviewed and improved an early version of the Berlin chapter. Alejo Molinari kindly reviewed the final version of the Buenos Aires chapter. I would also like to thank Verena Seiler and Hartmut Beck for their comments on the Uganda chapter. Annemie Denzer provided encouragement and advice throughout the final year of writing this book. Marc Beschler smoothed over the language of the final manuscript.

Any remaining errors are, of course, my own.
# Contents

1 **Introduction** ................................................................. 1  
   The Tragedy of Utilities in Developing and Emerging Countries ........ 1  
   The Water Privatization Wave of the 1990s ............................... 2  
   The Role of the IMF, the World Bank and the IFC ....................... 3
