Merkel Cell Carcinoma
Merkel Cell Carcinoma
To my husband, Ron, who continues to provide enduring companionship, encouragement, and support during our life’s journey together.

Siegried S. Yu

I dedicate this book to my loving wife, Jen, and my kind, caring, curious sons, Tyler and Nathan. Thank you for providing meaning in life.

Jeremy S. Bordeaux

To Noor and Ali, my only niece and nephew, respectively, and to MP and BT, who were patient.

Murad Alam
Preface

Poorly understood with regard to etiology, risk factors, and treatment, Merkel cell carcinoma is growing in incidence. Compared to other nonmelanoma skin cancers, Merkel cell is aggressive and frequently deadly. Yet the dissemination of information about this tumor remains inadequate even among specialists.

The purpose of this volume is to provide an accessible introduction to the clinical management of Merkel cell carcinoma for the interested specialist in dermatology, oncology, surgical oncology, plastic surgery, and allied disciplines. Practical elements of presentation and epidemiology are described, and the need for multimodal treatment is highlighted. Chapters on particular therapeutic approaches are written by experts in the relevant specialties. Treatment algorithms and case studies are provided to coalesce the large quantity of detailed information into a manageable, usable form. Finally, chapters on basic science and future research directions are included since ongoing investigations are crucial to battling this tumor.

Much remains to be done to better manage Merkel cell carcinoma. Here, we provide a starting point that cumulates the knowledge that we have, suggests guidance for treatment, and offers hope for the future.

Acknowledgements

We are particularly thankful that Springer initially recognized the need for a book on this important topic, a life-threatening disease seen increasingly often. We are very grateful to Rebekah Amos, our editor at Springer, who allowed us to proceed with this book, and who provided constant support and reassurance to move it to completion. Michael D. Sova, our Developmental Editor, was similarly exceedingly helpful in making sure that the many chapters came together and the production met Springer’s high standards.
# Contents

## Part I  Basic Science and Epidemiology

1  **Basic Science of the Merkel Cell** .................................................. 3  
   Stephen M. Ostrowski and Stephen Michael Maricich

2  **Epidemiology and Genetics (Including High Risk Patients, Polyomavirus, Prognostic Factors)** .............................................. 21  
   Garrett C. Lowe, Jerry D. Brewer, and Jeremy S. Bordeaux

## Part II  Diagnosis

3  **Clinical Diagnosis** .......................................................................... 39  
   Nancy Kim, Sandra Y. Han, and Siegrid S. Yu

4  **Staging** ............................................................................................ 53  
   Sherrif F. Ibrahim and Siegrid S. Yu

5  **Histopathologic Diagnosis** ............................................................ 65  
   Jeffrey North and Timothy H. McCalmont

## Part III  Therapy

6  **Local Excision (Primary, Recurrent Disease)** ............................. 89  
   Melanie Warycha and Murad Alam

7  **Lymph Node Procedures of the Head and Neck** ......................... 97  
   Chase M. Heaton and Steven J. Wang

8  **Lymph Node Procedures of the Trunk and Extremities** ............ 107  
   Julian Kim

9  **Radiation Therapy (Primary and Recurrent Disease)** .......... 119  
   William R. Silveira and Sue S. Yom

10  **Chemotherapy (Primary and Recurrent Disease)** ....................... 135  
    Rupali Roy and Timothy M. Kuzel

11  **Treatment Algorithm** .................................................................... 141  
   Douglas Winstanley and Seaver Soon
Part IV  Expert Opinions and Future Directions

12  Case Study A: Multiply Recurrent Merkel Cell Carcinoma .............................................................. 153
    Jerry D. Brewer

13  Case Study B: Radiation Monotherapy for Extensive Local and In-Transit Merkel Cell Carcinoma ...................... 157
    Sherrif F. Ibrahim, Sue S. Yom, and Siegrid S. Yu

14  Case Study C: Complete Spontaneous Regression of Merkel Cell Carcinoma Metastatic to the Liver ................. 161
    Natalie Vandeven and Paul Nghiem

15  Case Study D: Evaluation of Multiple Merkel Cell Carcinomas in a Single Patient .............................................. 165
    Iris Ahronowitz and Siegrid S. Yu

16  Case Study E: Multidisciplinary Management of Merkel Cell Carcinoma ............................................................. 169
    Adam R. Schmitt and Jeremy S. Bordeaux

17  Track and Attack: Emerging Prognostic and Therapeutic Approaches .............................................................. 171
    Olga Afanasiev and Paul Nghiem

Index ........................................................................................................................................................................... 185
